Cultural Context

Philosophy of Education in Cultural Context

(Twelve basic propositions to be analyzed throughout the course)

- 1. This will be a text-book for students of Education who do not have training in philosophy.
- 2. The purpose of the book is to provide, for teacher and students, a guide to an experience in philosophical reflexion, as related to public education.
- 3. The whole course will be based on an understanding of a frame of reference structured by three main concepts: nature, culture, and education.
- 4. Nature is defined as a given structured of fixed patterns of behavior in contrast with culture.
- Culture is defined as a man-made structure of changing patterns of behavior.
- 6. Education is defined, functionally, within this frame of reference, as a mediation between nature and culture.
- 7. As related to the nature of the child education is defined as the process of fulfillment of the child's potential of transcendence.
- 8. Transcendence is defined as the natural capacity for cultural achievement. Man. as whole, is defined by this potential.

- 9. Education and philosophy are both cultural patterns of behavior.
- 10. Education, as cultural behavior, is related to the child, the parents, the teachers, the community, and government.
- 11. Philosophy is defined as the search for the rational foundation of cultural behavior.
- 12. For each one of the agents concerned: child, parents, teachers, community, and government, the rational foundation must be differentiated, within the general of philosophy as cultural behavior.
- 13. This course will consist of eighteen semester weeks, three academic hours per week.
- 14. These students will be lead by the teacher in the intellectual experience of clarifying for themselves the concepts and the inter-relationships of the concepts as outlined. Emphasis will begiven in "clarifying for themselves" through philosophical discussion, instead of verbatim: learning or memorization.
